V-STROM DL 650A FEATURES

ADVANCED SUSPENSION

The new unit has undergone a rebuild, installing new technology such as the resin-coated pistons, and revising over 60 components of the engine to achieve a higher output in a broad area of the rev-range while keeping the unique V-Twin character

POWERFUL ENGINE

Newly designed down-type exhaust system is lighter and closer to the centre of gravity, contributing to nimble handling while being able to accommodate the slim and smart optional luggage system

ADVANCED BRAKING

Suzuki's Dual Spark Technology, unique in this class, utilises two spark plugs per cylinder for precision ignition. Combined with the newly adopted high-ignition nickel spark plugs, it contributes to increased combustion efficiency

DIGITAL DISPLAY

Conventional starter switches needed to be pressed by the rider until the engine starts, but the V-Strom 650 has adopted the Suzuki Easy Start System enabling the engine to start with one push of the button. A computerised ECM checks the status
